TRUFIG Receives TOPS Award from *Electronic House* Magazine

San Clemente, CA—TRUFIG™, the innovator of a revolutionary flush-mounting system that seamlessly integrates disparate devices and technologies including, touch panels, light switches, and outlets, into the architecture of residential and commercial buildings, has been honored by *Electronic House* magazine with a TOPS (Technology, Products and Service) award.

TRUFIG Installation Kits were selected as a winner in the Lighting Fixtures & Effects category by *Electronic House* editors, a group of distinguished industry experts and custom integrators. TRUFIG Kits join an exclusive group of products deemed the most noteworthy for the connected home. The award ceremony was held January 8, 2010 during the International CES Show in Las Vegas.

Rob Roland, General Manager for TRUFIG said, "Receiving this award is truly an honor for us and confirmation that the TRUFIG concept is highly desired by both custom installers and the design community. We have launched with a focused collection of products and are rapidly expanding our product offerings."

TRUFIG custom installation kits, designed for new construction or remodeling projects, use technology supplied by various manufacturers including Crestron and Lutron, to provide a consistent color, texture, and industrial design to any wall or ceiling surface. This, combined with a repeatable mounting

process, allows the architect and designer to achieve a perfectly seamless integration into the architecture.

TRUFIG offers an uncompromising, and previously unattainable, level of aesthetic refinement and precision that showcases the simplicity, beauty, and brilliance of visionary design.

About [TRUFIG](#)

TRUFIG was founded in 2008 by visionary entrepreneurs Scott Struthers and Geoff Spencer, founders of Dana Innovations, parent company of Sonance® and iPort®.

Founded in 1982, Dana Innovations' legacy of standard-setting design includes the world's first high-fidelity in-wall speaker system, the world's first integrated in-wall iPod® docking station, and the reigning design standard for architectural audio—the flush-mounted Sonance Architectural Series speaker system. TRUFIG and the creative freedom it brings designers—represents the culmination of more than 25 years of groundbreaking design innovation.
